

Project: Private Residence, London, NW3

We worked closely with our client One Flooring on this project located in the desirable Belsize Village, London.

The name Belsize Village was an invention of mid-Victorian developers. Daniel Tidey was the builder who constructed the large stucco villas in Belsize Park that gave the area its distinctive character and this property has been refurbished with a very keen eye to detail.

Such a project used only the highest specification in grade of floors, prime, in two designs, the beautiful Mansion Weave and Herringbone Blocks. Each in a sympathetic bespoke UV oil finish to the style of the newly decorated interior.

Product: 100% FSC Stability engineered European Oak Prime Grade Mansion Weave & Herringbone

Finish: Bespoke UV Oil Finishes

Quantity: Mansion Weave 47m² / Herringbone 88m²
