

Project: Google London HQ

The extraordinary Google HQ in the heart of London's Kings Cross is set to be the first wholly owned and designed Google campus, outside the USA.

Following the design brief from Google's architects and our client we supplied our European Oak, Rustic grade, solid strip flooring for the main office areas.

In line with Google's commitment to operating the business in an environmentally sustainable way, 100% FSC certified materials were specified. The floors were fitted unfinished and the flooring contractor site-finished the floor, to the approved sample, using Osmo hardwax oil.

Product: 100% FSC Solid European Oak Rustic Parquet Strip

Finish: Site Applied Bespoke Stain and Osmo Hardwax Oil

Quantity: 1200m²
