

## Project: Private residence, London, W10

WFA worked closely with a New York based architect and our client AJB Wood Flooring on this installation at a private residence in London. We created a unique distressed surface, combining our tumbled, brushed and bandsawn textures in a bespoke finish to compliment the light, contemporary interior scheme.

They chose a mix of widths from our Stability engineered flooring range in Quarter Sawn and Prime 100% FSC Oak. We also produced matching stair treads and risers for the architect designed, bespoke curved staircase.

**Product:** Stability Planks & Staircase – 100% FSC Certified European Oak Prime and Quarter Sawn

**Finish:** Bespoke Texture & UV Oil

**Quantity:** 380m<sup>2</sup>
